

Des Moines WRF Raw Influent

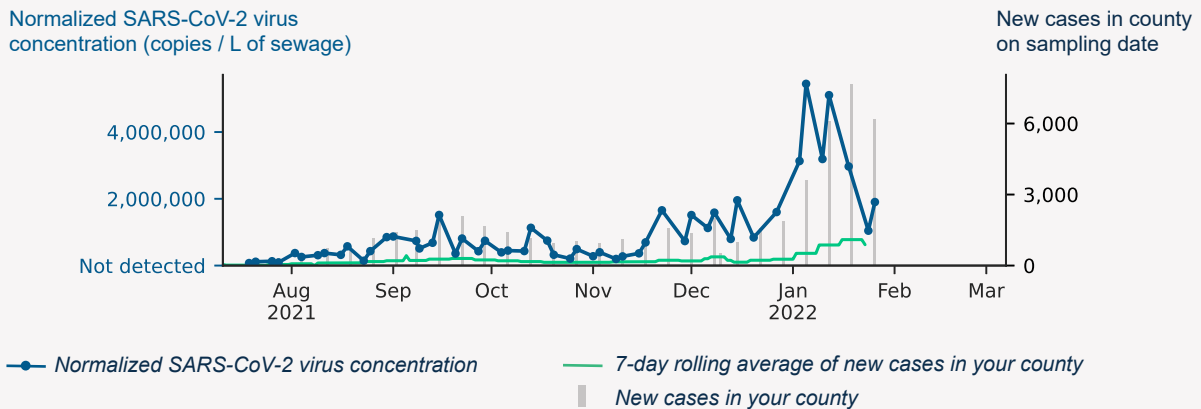

Sample collection date: **January 26, 2022**

SARS-CoV-2 virus in wastewater

DETECTED	Virus concentration (copies per liter of sewage) 2,694,168	Normalized* virus concentration (copies per liter of sewage) 1,903,292
-----------------	---	---

**Normalized virus concentration value is derived by adjusting the raw virus concentration to the PMMoV fecal marker in order to account for dilution*

Normalized virus concentration over time

Overview of normalized virus concentration levels

State-level mean of samples (collected in the past 6 weeks)

lower higher

Color indicates normalized virus concentration level

Your state outlined in red

Normalized virus concentrations trend with new cases

Normalized virus concentrations in comparison

Your sample has higher concentration levels than **50%** of all quantifiable samples collected in the past six weeks.
